- This service is designed for tenants who are planning to enter into a lease agreement with the ATC Building.
- The monthly fee includes costs for moving in and out, setting up, and dismantling.
- NTT, a Japanese telecommunications company, will enter into a contract with the ATC Building for fiber optic lines. As it takes about 1.5 months for NTT to install the fiber optic lines, when requesting this service, please calculate back about 1.5 months from your planned move-in date.
- Please note that if you obtain a telephone number, call charges will be billed separately.
